

Fix Homework

BAM Tips:

Opening the Network:

- File – Open – bam.nnd
- “Run” – “Recall” – “One”
- In lower left corner it will read “Enter name of pattern file (default: bam):” Just hit enter or type in bam.
- From here a screen will pop up so that you can adjust the pattern with a right or left mouse click. There will be Options such as “Scroll, Rewind, Enter, Quit, and Auto”.
 1. Scroll – pass through patterns
 2. Rewind – reverts to initial pattern
 3. Enter – fires BAM one time
 4. Quit – obvious!
 5. Auto - Please do not use Auto!
- Set parameters from “Utilities” - “Global L/R Schedule”
- Make sure that you hit “Recall” to get to the correct parameters, such as firing rate

Hopefully this should get everybody up and running!
